DETAILED ACTION

Response to Arguments

1. Claims 6-7 , directed to a method for operation previously withdrawn from consideration as a result of a restriction requirement, after amendment dated 02/17/2007, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.
2. Applicant's arguments filed 02/17/2009 have been fully considered but they are not persuasive, because a magnetic apparatus of Putt teaches a base (2,4,see Fig.1) and a first movable part (8), which can be moved along an axis, wherein a first magnetic force effect for movement of the first movable part is produced between the base and the first movable part, and a second magnetic force effect for movement of a second movable(10) part is produced between the first movable part and the second movable part, which can be moved along the axis (see Fig. 1)

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 09/16/2005.
 4. The submission is in compliance with the provisions of 37 CFR 1.97.
- Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-7 are under 35 U.S.C. 102(b) as being anticipated by Putt US patent 4,340,846.

Regarding claims 1 and 6, Putt US patent'46 discloses a magnetic apparatus for linear drive comprising a base (2,4, See Fig. 1)and a first movable part (8), which can be moved along an axis, wherein a first magnetic force effect for movement of the first movable part is produced between the base and the first movable part, and a second magnetic force effect for movement of a second movable(10) part is produced between the first movable part and the second movable part, which can be moved along the axis, wherein the second movable part is mounted such that it can move on the first movable part (see column 3 ,lines 9-34).

7. Regarding claim 2, Putt US patent'46 discloses a magnetic apparatus for linear drive a first and a second permanent magnet (8,10, see column 5, line 46-55) .

8. Regarding claim 3, Putt US patent'46 discloses a magnetic apparatus for linear drive further comprising field windings (14, see Fig. 1) arranged at a fixed angle with respect to the first movable part.

9. Regarding claim 4, Putt US patent'46 discloses a magnetic apparatus for linear drive wherein the second movable part is a plunger-type armature (14 see Fig.1).

10. Regarding claims 5 and 7, Putt US patent'46 discloses a magnetic apparatus for linear drive, wherein each of the movable parts has an associated field winding (8,14).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
